

Tech Tip

RoadRunner In-Car Digital Video Systems Camera Settings (RR-CZ26)

Default Settings

The RoadRunner 26x Zoom Color Camera is programmed to the settings listed below prior to shipment. Use the directions listed below to restore the camera settings to the factory default.

Press the MENU button located on the back of the camera. Viewing these menus on your LCD display or laptop computer, change the settings as listed:

- DISPLAY: The camera ID setting should be listed as OFF
- D&N: Adjust the D&N mode to DAY
- AWB: The AWB mode should be set to OUTDOOR
- FOCUS: The focus should be set to MANUAL, with a focal distance of 2M

Custom Setting: License Plate Mode

The following settings will provide the best results for viewing license plates in low-light / night-time applications:

Press the MENU button located on the back of the camera. Viewing these menus on your LCD display or laptop computer, change the settings as listed:

- GENERAL: Set the Camera ID to 001, and the Protocol to P/D
- FOCUS: The focus should be set to MANUAL, with a focal distance of 2M
- AWB: The AWB mode should be set to OUTDOOR
- D&N: Adjust the D&N mode to DAY
- AE: Set the AE mode to AGC MAN, set the flickerless mode to ON
- BLC: The backlight should be set to ON
- DISPLAY: Set the camera ID setting to OFF
