### **Apollo Video Technology Celebrates 10 Year Anniversary** *20,000 Mobile Video Surveillance Systems Deployed Since 2004*

BOTHELL, Wash., March 10, 2014 – Apollo Video Technology (Apollo Video), the No. 1 supplier of transit bus mobile video surveillance systems, today celebrates its 10 Year Anniversary.

Since its inception in 2004, Apollo Video has provided industry-leading technology advancements for mobile video surveillance systems for transit, rail, law enforcement, and government applications. Incorporating fleet-wide management, advanced networking capabilities, and the highest quality video recording, Apollo Video's solutions have been deployed at over 350 organizations worldwide. This represents sales of over 20,000 of the company's flagship product, the RoadRunner™ digital video recording system.

The RoadRunner system features onboard cameras for monitoring video and audio surveillance inside and around transit buses, rail cars, and law enforcement and government vehicles. Combining powerful and durable hardware solutions with sophisticated software, the system delivers streamlined and fleet-wide management to increase accessibility of data, reduce maintenance and operating costs, improve fleet efficiency, and mitigate risk and liability.

"It's incredible to see the developments that have been made in technology over the past 10 years," said Rodell Notbohm, CEO and founding partner of Apollo Video Technology. "I am honored to be part of such a great team of employees that continue to spearhead advancements in this industry. Maintaining great relationships with our customers, learning about their challenges and creating solutions to solve their specific needs has been pivotal to our success."

To keep up with growing market demands, Apollo Video has recently expanded staffing and earlier in 2013 moved to a larger facility to allow for greater manufacturing capabilities and faster production. An increased investment in advancing technology and support of customer demands confirms Apollo's commitment to providing the most innovative, reliable, and effective mobile video and fleet management solutions.

### **About Apollo Video Technology**

Apollo Video Technology is a leading manufacturer of video surveillance and fleet management solutions for public transit, rail, school transportation, law enforcement, military, commercial transportation, fire and EMS applications. With public and private-sector installations throughout North America and worldwide, the RoadRunner™ mobile video and audio recording system provides exceptional video quality with management software optimized for wireless downloading and live video streaming.

Renowned for its reliability, durability and ease of use, our solutions improve accessibility of data and deliver streamlined, fleet-wide management of video surveillance and on-board equipment to reduce liability, mitigate risk, improve efficiency and reduce maintenance and operating costs. Apollo Video is unique in the industry with software interoperability and compatibility across multiple generations of hardware.

In 2013, Apollo Video was named the No. 1 supplier of transit bus mobile video surveillance equipment in the World<sup>1</sup> and continues to be the No. 1 supplier in the Americas, since 2010 - an achievement that further supports the company's commitment to offer its customers superior, compatible solutions throughout the lifetime of their fleet.
