## **Apollo Video Technology Receives New Flyer Top Honors for Second Consecutive Year** *Award Recognizes Apollo Video's 2012 Delivery Performance*

Bothell, Wash. – May 28, 2013 – Apollo Video Technology (Apollo Video) has been recognized with the Gold award from New Flyer Industries Canada ULC (New Flyer) for delivery performance in the 2012 calendar year. This is the third performance award Apollo Video has received from New Flyer and the second consecutive “gold” rating.

The Supplier Delivery Performance Awards are presented to suppliers with significant shipment volumes and an overall on-time performance level of 95 percent or higher. Apollo Video achieved a performance level of 99 percent and is recognized for delivering value-based quality products on time to New Flyer production facilities.

New Flyer is the leading manufacturer of heavy-duty transit vehicles in the U.S. and Canada. The company's three facilities -- in Winnipeg, Manitoba, St. Cloud, Minn. and Crookston, Minn. -- are all ISO 9001, ISO 14001 and OHSAS 18001 certified.

Apollo Video provides New Flyer with the mobile video surveillance systems for its buses built for Apollo Video and New Flyer's mutual transit customers. Apollo Video's RoadRunner™ DVR system provides onboard cameras for monitoring video and audio surveillance inside and around transit buses, rail cars and other vehicles. In recent years, New Flyer has eliminated its warehouses, with the delivery of incoming parts direct to the point of use on the production line by partnering with suppliers such as Apollo Video.

“We are honored to receive top honors from New Flyer for a second consecutive year,” says Rodell Notbohm, CEO and founding partner of Apollo Video Technology. “Once again, we owe our success to an exceptional team and the capacity of our manufacturing capabilities. Our consecutive rating of ‘gold level status’ shows our ongoing commitment to excellence and to providing New Flyer with quality service. This award is, once again, an honor for our organization.”

Apollo Video Technology is a leading manufacturer of video surveillance and fleet management solutions for public transit, rail, school transportation, law enforcement, military, commercial transportation, fire and EMS applications. With public and private-sector installations throughout North America and worldwide, the RoadRunner™ mobile video and audio recording system provides exceptional video quality with management software optimized for wireless downloading and live video streaming.

Renowned for its reliability, durability and ease of use, our solutions improve accessibility of data and deliver streamlined, fleet-wide management of video surveillance and on-board equipment to reduce liability, mitigate risk, improve efficiency and reduce maintenance and operating costs. Apollo Video is unique in the industry with software interoperability and compatibility across multiple generations of hardware.

In 2011, Apollo Video was named the No. 1 supplier of transit bus mobile video surveillance equipment in the Americas<sup>1</sup> - an achievement that further supports the company's commitment to offer its customers superior, compatible solutions throughout the lifetime of their fleet.

Since its release in 2004, Apollo Video has supplied the RoadRunner system to over 340 agencies worldwide, representing over 17,000 total implementations.
