High-Resolution Cameras Now Standard for Transit and Rail Video Surveillance Systems

[Apollo Video Technology](http://ApolloVideoTechnology.com) Ensures Highest Performance and Image Quality of Video Evidence

WOODINVILLE, Wash., February 04, 2011 – [Apollo Video Technology](http://ApolloVideoTechnology.com) (Apollo Video) announces that 100 percent of the company's [mobile video surveillance cameras](#), manufactured specifically for all types of mass transit and rail vehicles, are operating in high resolution. Installed cameras capture images at a minimum of 540 TV lines of resolution, with some capturing images at 550 TV lines of resolution. This equipment is now standard across Apollo Video's entire range of camera equipment – interior and exterior mounting – on all vehicle types, including transit, paratransit and passenger rail.

The standardization of high-resolution cameras allows Apollo Video's entire inventory of camera equipment to create the highest quality of play-back video and live video feeds. Cameras capturing video in high resolution also feature technologies such as wide-dynamic range to respond better in bright light or varying light conditions.

"We design surveillance equipment that goes beyond just meeting our customers' needs, but provides their fleets with the highest performance and reliability including high resolution and backwards compatibility regardless of the age of the system installed," said Rodell Notbohm, general manager of Apollo Video Technology. "With the standardization of high-resolution cameras across all of Apollo Video's offerings, we're making a promise to our customer that high-quality video evidence will help protect the safety and security of their passengers and community."

Other features of Apollo Video's camera equipment include:

- IR illumination for recording in low-light conditions
- Built-in audio recording
- Exterior cameras with IP67 rating for outdoor use designed to withstand bus washes, weather and impacts from environmental factors such as tree branches
- Exterior cameras with heaters

About Apollo Video Technology

Apollo Video Technology (www.avt-usa.com) is a leading manufacturer of on-board and in-car digital surveillance systems for public transit, school transportation, law enforcement, military, freight transport, and fire and EMS applications. With government and private-sector installations throughout North America and worldwide, Apollo Video's Mil-Spec and SAE rated RoadRunner line of video and audio systems simplifies real-time video capture and reduces overall costs with exceptional quality, durability and easy offloading of video.

Since its release in 2004, The RoadRunner system has been installed in nearly 300 agencies worldwide – representing over 10,000 total implementations. Apollo Video Technology has been selected to provide digital video and audio surveillance systems by prominent public agencies such as Chicago METRA, King County METRO, Kansas City Area Transit Authority, Edmonton Transit System, Los Angeles County Metro Transportation Authority, City of Lincoln Nebraska and Winnipeg Transit.
